

CSC EUDAT Common Data Infrastructure (CDI) Services

Introduction

This page includes information, documentation and calendar for CSC services based on the [EUDAT CDI services components](#).

CSC service is based on [EUDAT CDI services components](#) (software) and includes CSC hardware, helpdesk and consultation.

Have to note here that EUDAT CDI components have internal dependencies. For example, user identity management is done using B2ACCESS for CDI service components.

Since B2ACCESS service is not provided by CSC, it is from a third party service provider and will also have an impact on SLAs for CSC provided EUDAT service

More detail information on the services will be available in the individual service page under [EUDAT CDI services components](#).
