

Software available in FGCI

Software installed to CVMFS environment of FGCI

- [AMBER](#)
- [BLAST](#)
- [CP2K](#)
- [Conda/Bioconda](#)
- [Dalton](#)
- [GPAW](#)
- [GROMACS](#)
- [LAMMPS](#)
- [Matlab Compiler Runtime](#)
- [Molden](#)
- [OpenFOAM](#)
- [ORCA](#)

Software originally installed to FGI but working in FGCI too

- [EMBOSS](#)
- [EXONERATE](#)
- [MrBayes](#)

FGCI/FGI Applications with command line interfaces;

- [BLAST](#) sequence similarity search tool
- [Exonerate](#) A generic tool for pairwise sequence comparison
- [InterProScan](#) Protein motif and signature detection tool
- [SHRiMP](#) short read mapping tool for NGS data (including color space data)
