

Plugins

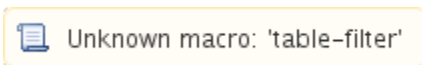

Confluence instance plugins worth considering:

- Google Calendar - Embed a calendar to your page from a google account
- Balsamiq Mockups - Do scetching of user interfaces (UI). License for your user account can be activated by contacting the administrators (confluence at csc.fi). Usage: Edit - Insert - UI Mockup

EULA Violation: This version of Balsamiq Wireframes for Confluence is more recent than what your license allows. Please contact your Confluence administrators so that they can purchase a maintenance license and make this annoying message disappear. :)

Table filtering: (Insert - Other Macros - All - search "table" - Table Filter)

Sortable tables (add normal table, click on the column titles)

Direction	Speed	Mass
12	5	4
146	2	10
230	11	2

Mathematical notation (Insert - Other Macros - Formatting - Mathdisplay)

$$\left[\left[\frac{1}{\text{Bigl}(\sqrt{\phi} \sqrt{5}) - \phi \text{Bigl}} e^{\frac{25}{\pi}} = 1 + \frac{e^{-2\pi}}{1 + \frac{e^{-4\pi}}{1 + \frac{e^{-6\pi}}{1 + \frac{e^{-8\pi}}{1 + \dots}}}} \right] \right]$$
