

FGI Hands on tutorial

FGI Hands on tutorial

Below are links to tarballs and zip files of the user course materials. These packages contain the user course presentation, the exercise documentation, and the exercise files.

Please note that to do the exercises, you need to go through the [Getting started with FGI](#) instructions first.

- [usercourse-web.tar.gz](#)
- [usercourse-web.zip](#)

Next steps

After setting up your client, submitting your first job and trying out our Hands on tutorial you might want to check which tools are available in FGI. Please proceed to our [Applications and Runtime Environments](#) page there you'll find more about the software available in FGI and how to use it.

Note: If you have any doubt, please [contact us](#).
